1. COURSE OBJECTIVES

The objectives of this course are to

- To give inputs to students regarding effective listening skills for better comprehension of academic lectures and English spoken by native speakers.
- To make students aware of reading strategies for comprehension of various academic texts and authentic materials.
- To improve speaking skills through participation in activities such as role plays, discussions and structured talks/oral presentations.
- To impart effective strategies for good writing and demonstrate the same in summarizing, writing well-organized essays, record and report useful information.
- To offer relevant inputs regarding grammatical structures and vocabulary and encourage their appropriate use in speech and writing.

2. PREREQUISITES

Students should have knowledge on

1. Enhancing communication skills.
2. Learning LSRW Skills and vocabulary.

3. SYLLABUS: UNIT III

Lesson: Elon Musk

Listening: Listening for global comprehension and summarizing what is listened to.

Speaking: Discussing specific topics in pairs or small groups and reporting what is discussed

Reading: Reading a text in detail by making basic inferences - recognizing and interpreting specific context clues; strategies to use text clues for comprehension.

Writing: Summarizing, Note-making, Paraphrasing

Grammar and Vocabulary: Verbs—tenses; Subject-verb agreement;
Compound words, Collocations

4. COURSE OUTCOMES

1. Understand the context, topic, and pieces of specific information from social or Transactional dialogues spoken by native speakers of English. (L2)
2. Apply grammatical structures to formulate sentences and correct word forms. (L3)
3. Analyze discourse markers to speak clearly on a specific topic in informal discussions. (L4)
4. Evaluate reading/listening texts and to write summaries based on global comprehension of these texts. (L5)
5. Create a coherent paragraph interpreting a figure/graph/chart/table. (L6)

5. CO-PO/PSO Mapping

Elon Musk	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2

1. Enhancingspeakingskillsthroughindividualactivity.
2. Toimprovepublicspeakingabilitythroughgroupactivities.

Unit-III

Elon Musk

8. LECTURE NOTES

Summary

Elon Musk's life story begins in South Africa, where he was born. Later, he went on to become an American entrepreneur who co-founded PayPal and established SpaceX, a launch vehicle and spacecraft manufacturer. He was also one of the original major investors in and the CEO of Tesla, an electric car company.

Elon Reeve Musk is the eldest of his parents' three children, and a citizen of three countries: South Africa, Canada, and the United States. He was born in 1971 to Maye Musk, a model and nutritionist, and Errol Musk, an electromechanical engineer whom Elon has described as "a dreadful human being." Read the entire article to learn about Elon Musk History which is inspiring for generations to come.

Elon Musk Early Life

Musk was born in Canada to a Canadian mother and a South African father. Musk grew up with his head stuck in books and computers. He was bullied by his classmates and often beaten up by class bullies as a little, timid youngster until he grew strong enough to defend himself during a growth spurt in his teens. He developed a video game at the age of 12 and sold it to a computer magazine. Musk left South Africa in 1988 after getting a Canadian passport because he refused to support apartheid through compulsory military duty and wanted to pursue the higher economic prospects offered in the United States.

Elon Musk Qualification

1. Musk travelled to Canada at the age of 17 to attend Queen's University and evade military service in South Africa. Musk got his Canadian citizenship the same year, partly because he thought it would be easier to get American citizenship that way. Musk moved to the United States in 1992 to study business and physics at the University of Pennsylvania. He earned an undergraduate degree in economics before continuing on to earn a second bachelor's degree in physics. Musk went to Stanford University in California to earn a Ph.D. in energy physics after leaving Penn. But that Ph.D. couldn't

make it to Elon Musk Degrees since he walked out of Stanford after only two days to start his first firm.

ElonMuskWorks

In the summer of 1995, Musk relocated to Silicon Valley. He enrolled at Stanford University's PhD programme in applied physics, but dropped out after only two days. Elon's 15-month younger brother, had recently graduated from Queen's University with a business degree and had travelled to Californiatojoinhim.AstheearlyInternetgrewinpopularity,thebrothers decided to develop a company called Zip2, an internet business directorywithmaps.That'showElonMuskstartedenteringintothebusinessworld.

Zip2 eventually recruited angel investors and grew into a profitable firm thanks to the brothers' efforts. Zip2 was sold to Compaq for \$307 million in 1999 by the brothers. Elon subsequently went on to create his own online financial services company, X.com. Confinity, a company formed by Peter Thiel and two others mere months after X.com and with headquarters in the same building, was its main competitor. In March 2000, the two firms joined and adopted the name of their major product, PayPal, an online money transferserviceforindividuals.InOctober2002,Ebay,theonlineauctionsite, purchasedPayPalfor \$1.5billioninEbaystock.ElonMusk,whohadbeenthe largest shareholder in PayPal with 11.7% of the company's equity shares, foundhimselfwith \$165millioninEbaystockattheageof31.

Since leaving PayPal, he has founded, co-founded, and/or led companies focused on addressing three distinct existential risks to humanity's long-term survival: climate risk, single-planet dependency risk, and human species obsolescence risk. Two of these companies, SpaceX and Tesla Motors, he riskedhisentireearlyfortunetobuild.

Elon MuskSuccess Story

Musk joined engineers MartinEberhard and Marc Tarpenningto helpoperate Tesla Motors in 2004, where he played a key role in the development of the world's first electric vehicle, the Tesla Roadster. Musk took over as CEO and product architect after Eberhard was fired from the company in 2007 due to a series of conflicts. Tesla has grown to be one of the most popular and desirable vehicle brands in the world under his leadership.

Elon Musk's SpaceX has signed many high-profile contracts with NASA and the US Air Force to manufacture rockets and execute military missions. Musk has beenvocalabout hisdesire toworkwithNASAonacollaborativemission todeployanastronauttoMarsby2025.ElonMuskhasalwaysbeena

proponent of various space-age technologies, but it hasn't always been a smooth journey for him. He went on to become a small business owner and eventually the CEO of two creative firms after being bullied in school. But he made the decision to ascend from there and never settle for anything less.

Tesla, in addition to creating electric automobiles, has a strong presence in the solar energy sector, courtesy to its purchase of Solar City. This clean-energy services company, which was founded in 2006, now develops two rechargeable solar batteries that are primarily used for stationary energy storage. The Powerwall is designed for residential backup power and off-grid use, whereas the Power pack is designed for business or electric utility grid use.

Facts about Elon Musk

- Elon Musk was born in the year 1971 in South Africa.
- He is best known for co-founding Tesla Motors and SpaceX, but he first got his wealth as a PayPal co-founder.
- Tony Stark, the fictional character created, was heavily influenced by Musk (a.k.a. Iron Man). Indeed, elements of Iron Man 2 were shot both inside and outside of SpaceX. Even Elon Musk makes an appearance in the film!
- Musk's official annual pay for Tesla Motors is \$1, similar to that of Steve Jobs and other well-known entrepreneurs.
- Musk taught himself computer programming at the age of 12 and produced the video game Blastar, which he sold for \$500.
- Elon Musk did not become an American citizen until he was 31 years old, in 2002.
- Elon Musk immigrated to Canada from South Africa when he was 17 years old. He eventually went to the University of Pennsylvania in the United States for college.
- Musk moved to California after graduation to pursue physics graduate school at Stanford University. He dropped out of Stanford after only two days, opting to take advantage of the booming Internet industry.
- Musk swiftly founded his first startup, Zip2, which supplied online newspapers with maps and business directories, after dropping out of graduate school. In 1999, he sold the company for \$307 million.
- Musk co-founded X.com in 1999, an online payment startup that later became PayPal before being purchased by eBay for \$1.5 billion in equity (of which Musk received \$165 million).

- Tesla Motors, a firm that designs and manufactures electric sports automobiles, was co-founded by Musk. Tesla was able to flourish where other significant manufacturers failed in the electric vehicle sector. He is presently Tesla's CEO and chief product architect.
- The National Highway Safety Administration gave the Tesla Model S a 5.4/5 safety rating, the highest ever given to a car.
- Musk is one of the driving forces behind SolarCity, which he and his cousins created. He is also the company's main shareholder.
- Elon Musk also created SpaceX (formerly known as Space Exploration Technologies), a corporation that designs and manufactures space launch vehicles, with a concentration on rocket technology. His goal is to lower the cost of space travel in order to expand human life beyond the Earth.
- Musk originally struggled to raise funds for SpaceX, which investors dismissed as a pipe dream. Musk put all of his personal funds into SpaceX in order to make it a reality (going against every piece of business advice ever written).

Conclusion

Elon Musk has shown entrepreneurial inclination since he was a child. His Engineer father and Dietician mother, who recognised and encouraged his son's passion in technology, accepted him warmly. He got his first computer when he was ten years old and taught himself how to programme. At the age of 12, the young boy built a fully playable video game called "Blaster," which he allegedly sold for \$500. Elon Musk attended Pretoria Boys High School and graduated in 1988. To avoid South Africa's obligatory military duty, he went to Canada in 1989 and enrolled at Queen's University in Ontario. He only stayed at the University of Pretoria for five months after that. Musk went to the University of Pennsylvania's Wharton School of Business to earn a bachelor's degree in economics. He also left after two days to pursue his entrepreneurial ambitions after being accepted into the University of Stanford's Physics Graduate Program.

LISTENING

LISTENING FOR GLOBAL COMPREHENSION

Global comprehension means understanding the general meaning of what you are listening to or reading. It can be compared to selective comprehension, which means understanding specific information in the text, and detailed comprehension, which means understanding everything. Global, selective and detailed comprehensions have parallels with the three reading skills of skimming, scanning and intensive reading.

Example

The learners have listened to a story and now try to recreate it by putting jumbled sentences into the correct order.

In the classroom

Various activity types can test global comprehension. Learners can be asked to sort out jumbled versions of a text, as in the example, produce or complete summaries, answer comprehension questions that test general understanding, such as 'true or false' statements, and suggest titles.

SPEAKING

Discussions, reporting what was discussed

Here are a few points to keep in mind during your discussion.

- Listen carefully when a person is speaking. If you are the person designated to report the discussion, make notes as you listen.
- Do not interrupt the person who is speaking. Allow them to finish their point and then make yours.
- Give everyone a chance to speak.
- Speak politely, even when you disagree. Here are some phrases you can use
- I'm sorry, but I don't agree.
- Excuse me, but I think...
- I'm afraid I have to contradict you.
- Look at it from this angle...
- Why don't you look at it from this point of view? Don't be aggressive or shout the other person down, however much you disagree with them.

• If you agree with a point, make sure to let the person know. You can nod, or use phrases such as:

- I agree.
- Absolutely!
- That's true.
- If you do not understand something, ask for clarification. These sentences and phrases may help:
 - You're quite right!
 - Could you please repeat that point? I'm afraid I didn't understand your point.
 - Could you explain that please?
 - Is this what you meant?

READING

Drawing inferences

Inferences are evidence-based guesses. They are the conclusions a reader draws about the unsaid based on what is actually said. Inferences drawn while reading are much like inferences drawn in everyday life. If your best friend comes in from a blind date and looks utterly miserable, you would probably infer the date was not a success. Drawing inferences while you read requires exactly the same willingness to look at the evidence and come to a conclusion that has not been expressed in words. Only in reading, the evidence for your inference consists solely of words rather than actual events, expressions, or gestures.

What You Need to Know About Inferences:

1. There are logical and illogical inferences, inferences that "fit" the rest of the text and inferences that don't. Make sure your inference has the right fit by relying on the author's words more than on your own feelings and opinions. To give you an obvious example: If the writer uses glowing language to describe the presidency of Bill Clinton but never states an opinion of the Clinton years in office, you probably shouldn't infer that the writer is a Clinton critic just because you yourself thought Bill Clinton was a terrible president.
2. Think of inferring implied main ideas as a two-step process, moving from part to whole. Your first step is to understand what each sentence contributes to your knowledge of the topic. Next ask yourself what the sentences combine as a group to suggest. The answer to that question is the implied main idea of the paragraph.
3. If you draw an inference about the main idea, check to see if your inference is contradicted by any statements in the paragraph. If it is, you

have probably drawn an illogical inference, one that does not follow from the information given. With particularly difficult readings, see if you can actually identify the language or statements that led you to the main idea you inferred. This kind of close reading is a great inference check. It also gives you practice doing the kind of thoughtful reading that guarantees remembering.

4. Transitions such as "consequently," "next," and "in summary" definitely help readers make connections between sentences and paragraphs. Transitions are the considerate author's way of saying, "This is the connection you need to make between what you just read and what's coming up." However, transitions are not as commonly used as readers might like. It's often the reader's job to supply sentence and paragraph connections. In other words, it's the reader's job to draw the right inference. If a sentence doesn't open with a transition—and a good many won't—make sure you know how the sentence you are reading connects to the idea that came before.

5. Pay especially close attention to sentence openers. That's where you will often get the clues you need to infer relationships between sentences and paragraphs.

6. Be on the look-out for key allusions or idioms (expressions that might seem completely out of place to those just learning the language, but which make sense to those who grew up hearing or reading these expressions), e.g., she loved her job; the money was "icing on the cake".

Allusions and idiom softens suggest meanings that are central to the author's message.

For instance, if the writer says that "the shotgun marriage between the unions and management dissolved once the war was over" you can infer that the unions and management were working together because they were forced to by necessity. However, the writer doesn't say anything about either side being forced by necessity. Instead, she uses an idiom and expects reader to draw the correct inference.

7. If the text includes visual aids but neither the title nor caption tells you exactly how they relate to the author's meaning, take the time to figure out the relationship between text and graphic. Inferring relationships between the author's words and the visual aids will deepen your overall understanding of the point or points being made. You will also have two ways, one verbal, one visual, to anchor information in long-term memory.

To get you started thinking about inferences, here are a few warm-up exercises. If you sail through these, you can find more at Online Practice for Reading for Results.

Exercise1

Directions: Each item in this exercise describes a famous person. It's your job to infer the name of the person described.

1. A small-town lawyer from Illinois, tall and lanky with an Adam's apple that could have gone down in the Guinness Book of Records had it existed in the nineteenth century. Nevertheless, he changed the face of American history, steering it through a civil war that left both sides bloody. Who knows what more he could have done had an assassin's bullet not cut him down.

The person described is

In drawing the correct inference, which piece of information is more useful:

- a. He had a big Adam's apple.
- b. He steered the nation through a civil war. Explain your answer:

2. Glittering and shaking to the strains of "Proud Mary," this lady ruled the stage in the sixties, but like ruled the roost until she walked out the door. It took her almost a decade to get back on top but she still remains one of pop's great divas. Closing in on sixty, she can still belt out rock and roll with singers half her age, and "Simply the Best" just may qualify as her own personal theme song.

The person described is

In drawing the appropriate inference, which piece of information is more useful.

- a. She ruled the stage but Ikeruled the roost.
- b. She was a popular singer in the sixties.

Exercise2

Directions: For each situation, draw what you think is an appropriate inference.

1. You have just gotten a pit bull puppy from an animal shelter. He's lovable but nervous. If you raise your voice for any reason, he cowers and trembles. If you scold him, he hides. When you got him from the shelter, he had a slight limp and a deep scratch across his nose.

Inference:

2. You are a high school student sitting in class when a substitute teacher walks in and announces that your regular teacher is ill. Everyone in the class including you erupts in applause. The substitute rapshisknuckles on the desk for order, but the students ignore him and talk louder.

Inference Exercises: Answer Key

Exercise 1

1. Abraham Lincoln

Clue: He steered the country through civil war.

Explanation: Lots of people have big Adam's apples, but America has had only one civil war.

2. Tina Turner

Clue: She ruled the stage but Ike ruled the roost.

Explanation: There were many popular women singers in the sixties but only one was linked to a domineering husband named Ike

Exercise 2

Answers may vary.

1. Inference: The puppy may well have been abused by its former owners.
2. Inference: The students are going to take advantage of the substitute teacher.

WRITING

Paraphrasing

Paraphrasing vs Summarizing

Paraphrasing and summarizing are both related terms. They are often confusing for people. Paraphrasing and summarizing are essential techniques for an effective and efficient essay. These are an absolute must when dealing with scientific concepts. Both paraphrasing and summarizing are allowed and accepted till due credit is given to the original source, and only till the work is not copied and is free from any kind of plagiarism.

Paraphrasing

Paraphrasing is reading over a text and interpreting it in one's own words without changing the meaning of the original text. This excludes copying of text in any form. It is like grabbing the idea about a topic from another writer's work then transforming it into your own method of thoughts and words. Paraphrased material is almost equal to or slightly shorter in comparison to the original material. Paraphrasing is required sometimes to prove your point. It provides support and adds credibility to your own writing. It is also used to add depth to your work.

Paraphrasing is used:

- When another writer's work has to be used.
- When quotes are not used in the text.
- When the ideas have a greater relevance than the style of writing.
- When you want to simplify the work of another person.

Summarizing

Summarizing is the tool in writing which is used when you need the main idea of the text. It is a condensed form of the written text in your own words with only the highlights of the text. A summary is much shorter than the original text. It excludes the explanation of the text. Only the main idea or the basic information is included. Summarizing is used to refer to work that culminates into the present writing that you are doing. It is sometimes used when you want to draw attention to an important point. It is also applicable when you want to distance yourself from the original text.

Summarizing is used:

- When only the main ideas of the writer are to be identified.
- When only an overview of the whole work is required.
- When simplification is required.
- When only the main highlights of the work have to be mentioned.

How to Paraphrase Text

To paraphrase text, follow these four steps:

1. Read and Make Notes

Carefully read the text that you want to paraphrase. Highlight, underline or note down important terms and phrases that you need to remember.

2. Find Different Terms

Find equivalent words or phrases (synonyms) to use in place of the ones that you've picked out. A dictionary, thesaurus or online search can be useful here, but take care to preserve the meaning of the original text, particularly if you're dealing with technical or scientific terms.

3. Put the Text into Your Own Words

Rewrite the original text, line by line. Simplify the grammar and vocabulary, adjust the order of the words and sentences, and replace "passive" expressions with "active" ones (for example, you could change "The new supplier was contacted by Nusrat" to "Nusrat contacted the new supplier").

Remove complex clauses, and break longer sentences into shorter ones. All of this will make your new version easier to understand.

4. Check Your Work

Check your work by comparing it to the original. Your paraphrase should be clear and simple, and written in your own words. It may be shorter, but it should include all of the necessary detail.

PARAPHRASING: AN EXAMPLE

Original

Despite the undoubted fact that everyone's vision of what constitutes success is different, one should spend one's time establishing and finalizing one's personal vision of it. Otherwise, how can you possibly understand what your final destination might be, or whether or not your decisions are assisting you in moving in the direction of the goals which you've set yourself?

The two kinds of statement – mission and vision – can be invaluable to your approach, aiding you, as they do, in focusing on your primary goal, and quickly identifying possibilities that you might wish to exploit and explore.

Paraphrase

We all have different ideas about success. What's important is that you spend time defining your version of success. That way, you'll understand what you should be working toward. You'll also know if your decisions are helping you to move toward your goals.

Used as part of your personal approach to goal-setting, mission and vision statements are useful for bringing sharp focus to your most important goal, and for helping you to quickly identify which opportunities you should pursue.

Summarizing

To summarize text or speech:

1. Get a general idea of the original.

First, speed read the text that you're summarizing to get a general impression of its content. Pay particular attention to the title, introduction, conclusion, and the headings and subheadings.

2. Check Your Understanding

Build your comprehension of the text by reading it again more carefully. Check that your initial interpretation of the content was correct.

3. Make Notes

Take notes on what you're reading or listening to. Use bullet points, and introduce each bullet with a key word or idea. Write down only one point or idea for each bullet. Make sure your notes are concise, well-ordered, and include only the points that really matter.

4. Write Your Summary

Bullet points or numbered lists are often an acceptable format for summaries – for example, on presentation slides, in the minutes of a meeting, or in Key Points.

Some summaries, such as research paper abstracts, press releases, and marketing copy, require continuous prose. If this is the case, write your summary as a paragraph, turning each bullet point into a full sentence.

Aim to use only your own notes, and refer to original documents or recordings only if you really need to. This helps to ensure that you use your own words.

5. Check Your Work

Your summary should be a brief but informative outline of the original. Check that you've expressed all of the most important points in your own words, and that you've left out any unnecessary detail.

SUMMARIZING: AN EXAMPLE

Original

So how do you go about identifying your strengths and weaknesses, and analyzing the opportunities and threats that flow from them? SWOT Analysis is a useful technique that helps you to do this.

What makes SWOT especially powerful is that, with a little thought, it can help you to uncover opportunities that you would not otherwise have spotted. And by understanding your weaknesses, you can manage and eliminate threats that might otherwise hurt your ability to move forward in your role.

If you look at yourself using the SWOT framework, you can start to separate yourself from your peers, and further develop the specialized talents and abilities that you need in order to advance your career and to help you achieve your personal goals.

Summary

SWOT Analysis is a technique that helps you identify strengths, weakness, opportunities, and threats. Understanding and managing these factors helps you to develop the abilities you need to achieve your goals and progress in your career.

Summarizing

Summarization is a process of automatically condensing and rewriting a large chunk of text to create a small, crisp summary. A summarization system should give the reader most of the information present in the original document while also ensuring that no information has been lost during condensation.

What is Summarizing?

Summarizing or summarization means to develop a summary of a text or other resources. It is a text, a video or an article in an abridged form that:

- Communicates what is most important for the author of that content,
- Is written “in your own words” and
- States the information “someone needs to focus on” when studying that content.

The result of summarization must be a description of the most important features contained in the original source, in particular: the central theme, the main points and the key ideas.

Why do we use Summarizing?

- It acts as a great help for students to learn how to determine essential ideas and find out different details that can support those ideas and make them more useful.
- It helps the students to improve their focusing skills so that they can focus on phrases and keywords from the assigned long text. They focus on parts that are worth noting or remembering.
- A student learns how to convert a large text into a small text. The short text has to comprise all the main points that are in the long text for a proper and concise understanding.

How to Use Summarizing?

As we all know, summarizing is the process of converting a large text into its shorter version by retaining the main ideas from the large text in the shorter version. This chapter of summarizing is an important one. Students learn how to summarize a big text into a smaller one by understanding the following steps.

- Read the text to be summarized carefully to understand it.
- Keep in mind the purpose of the text by reviewing specific questions such as:

1. What was the author's purpose for writing this text?
2. What is the student's purpose for summarizing it?
3. Is the student summarizing to support this/her points?
4. Is the student trying to criticize the text through summarizing before collecting the main ideas?

- Collect the relevant information that matches your purpose in order to be effective in summarizing.

- Try to extract the main ideas from the long text, which seems relevant.

1. Main ideas can be found in topic sentences.
2. Try to distinguish between the main points and the subsidiary points.
3. Try to delete all the unimportant sentences that are not necessary.
4. Try to find synonyms of some words but don't change the meaning of the sentence.

- The structure of the text must get changed after collecting the main ideas from the larger text.

1. Try to identify the relationships that exist between words and sentences. You have to express these relationships in a different way while summarizing.
2. Try to change the grammar of the text by changing nouns, verbs, adjectives, etc. You can also break long sentences into shorter ones or combine short sentences into one long sentence.

3. Try to make the text simple by reducing complex sentences into simple sentences, simple sentences to phrases, and phrases to words.

Now rewrite the main ideas and information in complete meaningful sentences. Combine the notes that you made earlier to create complete sentences. Use conjunctions like therefore, however, although, since, etc.

After summarizing, the last step is to evaluate your work.

1. Ensure the purpose of the text is clear.
2. Ensure that the meaning of the long text and small summarized text is similar.
3. Ensure that style of writing is unique.

Importance of Summarizing

Summarizing is of great importance for students to prosper in their careers as it improves their vocabulary and grammatical skills. Students who can adequately summarize a long text are good at focusing and extracting the main ideas. This is why summarizing is important for students.

Note Making

Note making is an advanced writing skill which is acquiring increasing importance due to knowledge explosion. There is a need to remember at least the main points of any given subject. Making notes is a complex activity which combines several skills.

Benefits of Effective Note making:

1. Improves focus and attention to detail.
2. Promotes active learning.
3. Boosts comprehension and memory retention.
4. Can select important material and discard unnecessary content.
5. Extends attention span.
6. Increases organizational and creative skills.

Methods:

I. Linear/Outline/Sentence/Categorical Method:

In Linear/Outlines we use headings and bullets to structure information. It represents in a logical vertical structure with hierarchical relationships. It consists of headings that use Roman numerals, Arabic numerals and alphabet at different levels. For example:

- ☐ Read the passage carefully.
- ☐ Heading : Frame a heading based on the central idea.
- ☐ Subheadings: Frame subheadings based on the two or three subordinate/associated ideas.
- ☐ Points: The subtitles with indent have to be suitable i.e., space and number. All subheadings should be written at a uniform distance from the margin.
- ☐ The headings should not be abbreviated but abbreviates subheadings.
- ☐ Do not write full sentences.
- ☐ Capitalized first letters of words: e.g., U.P., U.S.A., U.K., U.S.S.R., etc.

- ❑ Common abbreviations: Sc. (for science), Mr., Mrs., Dr., Govt., etc
- ❑ Common symbols: e.g., \, ÷, +ve, -ve, ® (leading to), ↑ (rising), ↓ (falling), =, etc.
- ❑ Measurements and Figures: e.g., 100', 100", 100kg, 1000mm, 100ml, etc.
- ❑ Making your own abbreviations: ex: edn. (education), prog. (programme).
- ❑ Retain the suffix. E.g: ed'nal (educational), prog've (progressive).
- ❑ Use indent clearly to indicate subheadings, points & subpoints to come below one another.

Heading

1. Subheading

1.a Point 1

1.b Sub-Sub heading

1.b.1 Sub Point 1

1.b.2 Sub Point 2

1.c Point 1

2. Subheading 2

2.a Point 1

2.b Sub-Sub heading

2.b.1 Point 1

Key
abbr. - abbreviation
avt. - aviation
fmly. - family
pnt. - point
engg. - engineer

II. Cornell Method:

- ❑ The content is represented in this method in two sides.
- ❑ Divide your paper by drawing a vertical line one third of the way from the left-hand side of the page.
- ❑ Take the main notes in the area to the right of this line.
- ❑ Take notes about the main content in the area to the left of the line.
- ❑ Write down key words/terms, phrases, expressions or clues to summarize the information.

TYPES OF MATTER (TITLE)

KEYWORDS	NOTES
Solids	A. Have a definite shape B. Have a definite volume
Liquids	A. Do not have a definite shape B. Do not have a definite volume
Gases	A. Do not have a definite shape B. Do not have a definite volume
Summary/Conclusion	Write down the conclusion/summary

III. Schematic/Mapping Method:

- ❑ Mind maps are referred to as brain-storming.
- ❑ It is the visual representation of the aspects and relationship of the given content.
- ❑ Ideas are written in a tree structure, with lines connecting them together.
- ❑ It is drawn from a central point, purpose or goal in the center of the page and then branching outward to identify all the ideas connected to that goal.
- ❑ Colors, small graphics and symbols are often used to help to visualize the information more easily.
- ❑ Start with identifying the main topic. This should be at either the top or center of your diagram.
- ❑ Next, identify sub-topics or supporting main ideas. These should be located directly underneath or out from the center of your main topic.
- ❑ Continued downward or outward with supporting details until you have identified all relevant information.

IV. Charting Method:

- ❑ It can be useful for distinct information.
- ❑ It summarizes the categories showing comparisons.
- ❑ By drawing & labeling columns, we can record the information into the appropriate category.
- ❑ It reduces writing time, enables to summarize & compare the information easily & quickly.

Example: DATES	WAR	COUNTRIES	LEADERS
1939-1945	II World War	Germany, Japan, USA, France, Britain, Russia, France, Poland, etc	Hitler, Winston Churchill, etc.

Similarities between note-making and note-taking:

- ❑ Both provide material for easy reference, preparation and study for an exam, reference, etc.
- ❑ Both help in remembering facts easier as it utilizes both reading and listening skills.
- ❑ Both have the same purpose that is to excel in the studies and understanding the concept.
- ❑ Both help to concentrate better and more effectively.

Differences between note-making and note-taking:

Note-making	Note-taking
Making notes improves the skills in study	No improvement towards the skills in studying
Helps to see each point clearly along with its link or connection with each other.	Only jotting down points. Involves no sight interpretation.
Easier to change the notes made.	Very less changes are required.
Involve the taking of points from different sources.	Taking points from one source on a time.
Making notes should be able to help in capturing the main key/points.	Taking notes only gives the early configuration for the whole topic.
Shows the overall structure of specific subject.	Overall structure cannot show clearly as it is in complex form.
Constructed by the learner themselves, whether by hand-made or in computer-typed form.	Notes are made by sources. Only hand-made can be applied since the time occurred can be limited.
Helps to understand the topic related better.	Less understanding processes.
Making notes are often in short form as it comprises only the main points or key points/words that help the study process which involves the process of summarizing all the information within the points studied.	Points/notes were rewrite in full form. Points given by sources are taken straightly.

Activity:

NOTEMAKING PRACTICE PASSAGE

There are different forms of environmental pollution. Air pollution is caused by the burning of coal and oil. It can damage the earth's vegetation and effect respiratory problems in humans. A second type of pollution is noise pollution. It is the result of the noise of aircraft and heavy traffic. Further, loud music is also a cause of noise pollution which has been seen to affect people's hearing and give them severe headaches and high blood pressure. Another source of pollution is radioactivity, which occurs when there is a leak from a nuclear power station. Radioactive pollution is a deadly pollutant caused by the excess radiation through cell towers, nuclear waste which contaminates the air, water and soil. This causes irreparable harm to those exposed to it. Land and water pollution is caused by the careless disposal of huge quantities of rubbish, sewage and chemical wastes. Land pollution poisons the soil making the food grown in it unfit for consumption. Pollution of rivers and seas, on the other hand, kills fishes and other marine life and also becomes the cause of water-borne diseases.

GRAMMAR

VERBS

What is a verb?

Verbs are the action words in a sentence that describe what the subject is doing. Along with nouns, verbs are the main part of a sentence or phrase, telling a story about what is taking place. In fact, without a verb, full thoughts can't be properly conveyed, and even the simplest sentences, such as Maria sings, have one. Actually, a verb can be a sentence by itself, with the subject, in most cases you, implied, such as, Sing! and Drive!

List of all Verb Types

Action Verbs

Action verbs express specific actions and are used any time you want to show action or discuss someone doing something. It's important to remember that the action does not have to be physical.

Action verb examples:

Run

Dance

Slide

Jump

Think

Do

Go

Stand

Smile

Listen.

The action verb examples in the following sentences are in bold for easy identification.

I **run** faster than David.

He **does** it well.

She **thinks** about poetry all day long

Transitive Verbs

Transitive verbs are action verbs that always express doable activities that relate or affect someone or something else. These other things are generally direct objects, nouns or pronouns that are affected by the verb, though some verbs can also take an indirect object, such as show, take, and make. In a sentence with a transitive verb, someone or something receives the action of the verb.

Transitive verb examples:

1. Love
2. Respect
3. Tolerate
4. Believe
5. Maintain.

The transitive verb examples in the following sentences are in bold for easy identification.

Gary ate the cookies.

The transitive verb is **ate**, Gary is the subject, because it is Gary who is doing the eating, and the cookies are the direct object, because it is the cookies that are being eaten. Other examples:

He kicked John.

John punches him.

They sold the tickets.

Examples of verbs used with both direct and indirect objects:

They sell him the tickets.

In this sentence, the tickets are the direct object while him is the indirect object.

Mary baked her mother a pie.

In this sentence, a pie is the direct object while her mother is the indirect object.

Intransitive Verbs

Intransitive verbs are action verbs that always express doable activities. They are different from transitive verbs because there is no direct object following an intransitive verb.

Intransitive verb examples:

1. Walk
2. Laugh
3. Cough
4. Play
5. Run

The intransitive verb examples in the following sentences are in bold for easy identification.

We **travelled** to London.

The intransitive verb is **travelled**, the subject is **we**, because **we** are doing the travelling, but **London** is not a direct object because **London** is not receiving the action of the verb. Other examples:

Isneeze in the morning.

He **arrived** with moments to spare.

Kathryn **sat** away from the others.

John **eats** before leaving for school.

The last example shows that the verb **eats** can be both transitive and intransitive depending on whether there is a direct object or not. If the sentence read: John **eats** the cookies before leaving for school, **eats** would be transitive as there is a direct object – the cookies.

By the way, some verbs can be both transitive and intransitive. These verbs include: start, leave, change, live, stop.

Auxiliary Verbs

Auxiliary verbs are also known as helping verbs and are used together with a main verb to show the verb's tense or to form a question or negative. Common examples of auxiliary verbs include **have**, **might**, **will**. These auxiliary verbs give some context to the main verb, for example, letting the reader know when the action took place.

Auxiliary verb examples:

Would

Should

Do

Can

Did

Could

May

The auxiliary verb examples in the following sentences are in bold for easy identification.

I **will go** home after football practice.

The auxiliary verb **will** is telling us that the action of the main verb **go** is going to take place in the future – after football practice has ended. If the auxiliary verb **will** was removed, we get the sentence:

I go home after football practice.

In this case, there is no definite time frame for the action. The sentence suggests that going home after football practice is just something the subject generally does. Other examples:

I may dance with you later.

We did consider Bryan's feelings.

Jenny has spoken her final words.

In addition, we can sometimes use the auxiliary *very* before the pronoun to make a question:

Might you dance with me later?

Did we consider Bryan's feelings?

Has Jenny spoken her final words?

Also, auxiliary verbs are used to help form negative statements, with the use of words like *not* and *never*. These will usually split the auxiliary and main verbs:

I may never dance with you again.

We did not consider Bryan's feelings.

Stative Verbs

Stative verbs can be recognized because they express a state rather than an action. They typically relate to thoughts, emotions, relationships, senses, states of being, and measurements. The best way to think about stative verbs is that they are verbs that describe things that are not actions. The stative verbs are all expressing a state: A state of doubting, a state of believing, a state of wanting. These states of being are often temporary.

The stative verb examples in the following sentences are in bold for easy identification.

The doctor **disagrees** with your analysis.

Disagree is a stative verb here, as it describes the doctor's state of being—disagreement.

John **doubts** the doctor's opinion.

I **believe** the doctor is right.

She **wanted** another opinion.

Modal Verbs

Modal verbs are auxiliary verbs that are used to express abilities, possibilities, permissions, and obligations.

Modal verb examples:

1. Can
2. Must
3. May

4. Should
5. Would

The modal verb examples in the following sentences are in bold for easy identification.

He **can** shoot a three-point shot easily.

The auxiliary verb **can** is expressing an ability, suggesting that shooting a three-point shot is a skill the subject possesses.

Please note that in the case of **should** and **must** in the examples below, the modal verbs are expressing obligations, whereas **would** and **may** are expressing possibilities.

I **should** go home.

You **must** not delay.

Sally **would** not recommend the sushi.

David **may** be late.

Phrasal Verbs

Phrasal verbs aren't single words; instead, they are combinations of words that are used together to take on a different meaning to that of the original verb. There are many examples of phrasal verbs, some of which have colloquial meanings, such as **make up**, **hand in**, **bring up**, **point out**, **look forward to**. Each time the verb takes the extra word(s) it takes on a new meaning. For example, **make up** expresses that something is being created, whereas with **make up**, the suggestion is that there are some lies or a fantastical element to the story and **make out** can mean either to grasp or see something difficult, or to kiss passionately.

Phrasal verb examples:

1. Run out
2. Go all out
3. Make out
4. Hand out
5. Bring out
6. Face up
7. Think through

The phrasal verb examples in the following sentences are in bold for easy identification.

Mary **looked forward to** her high school reunion.

The verb **looked forward to** has taken on a new meaning to be excited about or eagerly await something.

He **brought up** the same points again and again.

Leroy **handed in** the wallet to the police.

I make up stories all the time.

She pointed out Donald's mistake.

Irregular Verbs

Irregular verbs are those that don't take on the regular spelling patterns of past simple and past participle verbs. Unfortunately, there are hundreds of irregular verbs in the English language. But don't worry, while many are used often, the majority are not in common usage – or if they are, you will use them so often you will learn them quickly. Some of the most common irregular

verbs include: say, make, go, take, come, know and see.

Irregular verb examples:

Eat

Think

Bring

Hold

Bear

Buy

Lay

Catch

Drive

Paid

Feel

Redo

The irregular verb examples in the following sentences are in bold for easy identification.

I **take** my time when I go to the shops (present tense)

I **took** my time when I went to the shops (past tense)

Julie **makes** cake for the classroom (present tense)

Julie **made** a cake for the classroom (past tense)

TENSES

Tenses play a crucial role in the English language. It denotes the time an action takes place, whether sometime in the past, in the present or will take some time in the future.

Types of Tenses

PAST TENSE

1) Simple Past Tense

Indicates an action took place before the present moment and that has no real connection with the present time.

For example, "He danced in the function." (The action took place in the past, is finished and is completely unrelated to the present)

"He flew to London yesterday."

Note

- a. The verb 'flew' is an irregular verb which does not take 'ed' in the past tense like regular verbs.
- b. The form of Simple Past Tense is- verb + ed

2) Past Perfect Tense

It indicates an action in the past that had been completed before another time or event in the past.

For example, "He had exercised before it started to rain."

"He had slept before I came back from the market."

Note: a. The form of Past Perfect Tense is- had + verb (past participle form or the 3rd form of the verb)

3) Past Continuous Tense

It indicates an action going on at some time in the past or an action in the past that is longer in duration than another action in the past.

For example, "It was getting darker."

"The light went out while they were reading."

Note: a. The form of Past Continuous Tense is- was/were + verb + ing

4) Past Perfect Continuous Tense

It indicates an action in the past that took place before another time or event in the past and continued during the second event/time point in the past.

For example, "at that time, he had been writing a novel for two months." "He had been exercising when I called."

Note: a. The form of Past Perfect Continuous Tense is - had + been + verb + ing

PRESENT TENSE

1) Simple Present Tense

It indicates an action that is generally true or habitual. That is, it took place in the past, continues to take place in the present, and will take place in the future. This tense is used to denote - A habitual action -

for instance, "He walks to school." General truths - for instance, "The sun rises in the east", "Honesty is the best policy." - a future event that is part of a fixed timetable - for instance, "The match starts at 9 o'clock."

Note: a. The form of Simple Present Tense is - verb (infinitive without 'to' and agreeable with the subject)

2) Present Perfect Tense

It indicates an action that has been completed sometime before the present moment, with a result that affects the present situation. For example, "He has finished the work." "He has slept."

Note: a. The form of Present Perfect Tense is - has/have + verb (past participle form or 3rd form of the verb)

3) Present Continuous Tense

It indicates an action that is taking place at the moment of speaking. For example, "She is walking." "I am studying."

Note: a. the form of Present Continuous Tense is - is/am/are + verb + ing

4) Present Perfect Continuous Tense

It indicates an action that started in the past and is continuing at the present time.

For example, "He has been sleeping for an hour."

Note: a. The form of Present Perfect Continuous Tense is - has/have + been + verb + ing

FUTURE TENSE

1) Simple Future Tense

Indicates an action that will take place after the present time and that has no real connection with the present time.

For example, "She will visit her ailing grandmother soon." "He will walk home."

Note a. the form of Simple Future Tense is - will/shall + verb

2) Future Perfect Tense

It indicates an action in the future that will have been completed before another time or event in the future.

For example, "By the time we arrive, he will have studied."

Note a. The form of Future Perfect Tense is - will/shall have + verb (past participle form or 3rd form of the verb)

3) Future Continuous Tense

It indicates an action in the future that is longer in duration than another action in the future. For example, "He will be walking when it starts to rain." Note a. The form of Future Continuous Tense is - will/shall be + verb + ing

4) Future Perfect Continuous Tense

It indicates an action in the future that will have been continuing until another time or event in the future.

For example, "He will have been exercising an hour at 2:00."

Note a. The form of Future Perfect Continuous Tense is - will/shall have been + verb + ing

TYPES OF TENSES: Chart

From a general view of tenses, this module will go on to discuss each tense in detail with examples and also New way to learn Tense with Examples and Exercises. The table below gives a glimpse of the way tenses are used using the

Types	Past	Present	Future
Simple	Played (verb+ed)	Plays (verb+s)	will/shall play (will/shall+verb)
Perfect	Had played (had+past participle)	has/have played (has/have+past participle)	will/shall have played (will/shall+past participle)
Continuous	was/were playing (was/were+verb+ing)	is/am/are playing (is/am/are+verb+ing)	will/shall be playing (will/shall be+verb+ing)
Perfect Continuous	had been playing (had been+verb+ing)	has/have been playing (has/have been+verb+ing)	will/shall have been playing (will/shall have been+verb+ing)

verb 'play' Test

Yourself

Q1. Choose the correct verb from those in brackets:

- The earth round the sun. (move, moves, moved)
- My friend the film yesterday. (see, saw, have seen)
- It started to rain while we tennis. (are playing, had played, were playing)
- I English for five years. (have been studying, study, am studying)
- The train before we reached the station. (arrives, will have arrived, had arrived)
- Don't disturb me. I my work. (do, did, am doing)

- g) Fortune the brave. (is favoring, will favor, favors')
- h) I ____ the letter before you arrived. (had written, wrote, will write)
- i) He us next week. (will have met, will have been meeting, will be meeting)
- j) Perhaps we _____ Delhi next month. (visit, will visit, visited)

1.9 SUBJECT-VERB AGREEMENT

Subjects and verbs must agree in number. In addition to the explanations on this page, also see the post on Subject—Verb Agreement.

1. If the subject is singular, the verb must be singular too.

Example: She writes every day.

Exception: When using the singular "they," use plural verb forms. Example: The participant expressed satisfaction with their job. They are currently in a managerial role at the organization.

2. If the subject is plural, the verb must also be plural.

Example: They write every day.

Sometimes, however, it seems a bit more complicated than this.

3. When the subject of the sentence is composed of two or more nouns or pronouns connected by and, use a plural verb.

Example: The doctoral student and the committee members write every day.

Example: The percentage of employees who called in sick and the number of employees who left their jobs within 2 years are reflective of the level of job satisfaction.

4. When there is one subject and more than one verb, the verb throughout the sentence must agree with the subject.

Example: Interviews are one way to collect data and allow researchers to gain an in-depth understanding of participants.

Example: An assumption is something that is generally accepted as true and is an important consideration when conducting a doctoral study.

5. When a phrase comes between the subject and the verb, remember that the verb still agrees with the subject, not the noun or pronoun in the phrase following the subject of the sentence.

Example: The student, as well as the committee members, is excited.

Example: The student with all the master's degrees is very motivated.

Example: Strategies that the teacher uses to encourage classroom

participation include using small groups and clarifying expectations.

Example: The focus of the interview was nine purposively selected participants.

6. When two or more singular nouns or pronouns are connected by "or" or "nor," use a singular verb.

Example: The chairperson or the CEO approves the proposal before proceeding. When a compound subject contains both a singular and a plural noun or pronoun joined by "or" or "nor," the verb should agree with the part of the subject that is closest to the verb. This is also called the rule of proximity. Example: The student or the committee members write every day.

Example: The committee members or the student writes every day.

7. The words and phrases "each," "each one," "either," "neither," "everyone," "everybody," "anyone," "anybody," "nobody," "somebody," "someone," and "no one" are singular and require a singular verb.

8. The words and phrases "each," "each one," "either," "neither," "everyone," "everybody," "anyone," "anybody," "nobody," "somebody," "someone," and "no one" are singular and require a singular verb.

Example: Each of the participants was willing to be recorded.

Example: Neither alternative hypothesis was accepted.

Example: I will offer a \$5 gift card to everybody who participates in the study.

Example: No one was available to meet with me at the preferred times.

9. Noncount nouns take a singular verb.

Example: Education is the key to success.

Example: Diabetes affects many people around the world.

Example: The information obtained from the business owners was relevant to include in the study.

Example: The research I found on the topic was limited.

10. Some countable nouns in English such as earnings, goods, odds, surroundings, proceeds, contents, and valuables only have a plural form and take a plural verb.

Example: The earnings for this quarter exceed expectations.

Example: The proceeds from the sale go to support the homeless population in the city.

Example: Locally produced goods have the advantage of shorter

VOCABULARY

2.0 Compound Words

A compound word is where two or more root words are merged into a new and different word. There are three different kinds of compound: open, closed, and hyphenated compound words. Read this handy guide to learn more about compound words and how they can be used in different sentences.

Common Compound Word Examples

In this table, you'll find a few examples of different compound words that you might have come across in everyday use:

Compound word	Individual words
Football	Foot + ball
Firefighter	Fire + fighter
Notebook	Note + book
Superhero	Super + hero
Railroad	Rail + road
Snowball	Snow + ball
Inside	In + side
Sometimes	Some + times

Different Forms of Compound Word

Now that we know what a compound word is, it's time to take a look at the different types of compound word. As we mentioned before, these are closed compound words, open compound words and hyphenated compound words.

But before we go on, it's important to bear in mind that a compound word doesn't have to be made up of just two words. It's also possible to use more than two words to form a compound.

So, let's explore the three types in more detail.

Closed Compound Words

Closed compound words are the most recognizable of the three different types. These words are created when other smaller words come together to form one new larger word.

For example:

- Waistcoat
- Railroad
- Postbox
- Sunflower
- Breakfast

Can you spot the individual words that make up each new word? If you can, it's likely you've come across a compound word!

Let's look at the compound word 'breakfast'. The two words that make up this compound are 'break' and 'fast'. The word 'fast' in this case does not mean moving quickly (though being able to quickly to prepare a meal first thing in the morning certainly has its benefits). Instead, 'fast' means a period of not eating. And as many will have spent the night sleeping, 'breakfast' is to break the fast.

The new closed compound words are therefore recognized as separate lexical items, with each having individual meaning.

Children can be introduced to closed compound words at an early age. And there are plenty of activities for kindergarten and first-grade children to try their hand at putting together compound words.

Open Compound Words

Open compound words are slightly different because they still appear as two words separated by a space. However, we still consider them a compound

word because when they are used together, they take on a new and different meaning.

For example:

Living room

Full moon

Real estate

Ice cream

Hot dog

Let's say a friend invites you to a picnic.

He asks, "Would you like a burger or a hot dog with your potato salad?"

You're more likely to think about the edible 'hot dog' as opposed to the adjective 'hot' describing the noun 'dog'. The two single words work together to form a new noun. Hence, this is why separated words, such as 'hot dog', can still be considered compound words.

Now let's take a look at hyphenated compound words, the third type of compound.

Hyphenated Compound Words

Hyphenated compound words can be tricky as there are many rules to remember. However, the main point to remember is that, in most cases, an open compound word will be hyphenated if it's to modify another noun.

For example, the term 'video game' is an open compound, but is typically hyphenated when modifying a noun such as the word 'player' or 'collector'. The new words are therefore written as 'video-game collector'.

The video-game collector was excited about the release of the latest adventure saga.

Hyphens are also typically used when a compound adjective is placed before a participle, or a word formed from a verb. These words also modify a noun. For example, "record-breaking snow" where the adjective comes before the present participle, and they both describe the noun "snow."

Let's look at a few other examples of hyphenated compound words:

Long-term

Mother-in-law

Good-hearted

Merry-go-round

Check-in

Twinkl Top Tip:

Occasionally, compound words are referred to as compound nouns. This is when two nouns are combined to form a new noun. A compound noun is a type of compound word that is used to describe a person, place, or thing.

For example, toothpaste, rainforest and sister-in-law are all compound nouns.

Compound words list

By now, you'll probably have a pretty good understanding of the three different types of compound word. You'll also be familiar with a few different examples of compounds, like 'football' and 'toothbrush'. But perhaps you'd like to see a few more examples for each different compound type.

In this section, we've put together a handy compound words list that contains 12 different examples of closed, open and hyphenated compound words. As you have read through this compound words list, you might spot a lot of words that are already familiar to you. You may even find some words that you didn't realize were compounds.

Closed compound words	Open compound words	Hyphenated compound words
Football	Living room	Brother-in-law
Aircraft	First aid	Long-term
Grandparent	Full moon	Far-fetched
Footpath	Real estate	So-called
Cardboard	Coffee table	Last-minute
Placeholder	Hot dog	Ear-splitting

Airport	Postoffice	High-tech
Blueberry	Cottoncandy	Mind-blowing
Firefly	Fryingpan	Great-grandfather
Watermelon	Highschool	Warm-up
Bedroom	Rollercoaster	High-rise
Battleship	Washingmachine	Half-baked

2.1 Collocations

A collocation is two or more words that often go together. These combinations just sound "right" to native English speakers, who use them all the time. On the other hand, other combinations may be unnatural and just sound "wrong". Look at these examples:

Natural English

Unnatural English

the fast train fast food

the quick train quick food

a quick shower a quick meal

a fast shower a fast meal Use

of collocations:

- Language will be more natural and easily understood.
- Can express ourself in alternative and richer ways.
- It is easier to remember.
- Use language in chunks or blocks rather than as single words.

Types of collocation:

There are several different types of collocation. Collocations can be adjective + adverb, noun + noun, verb + noun and so on.

1. Adverb + Adjective

- Invading that country was an utterly stupid thing to do.
- We entered a richly decorated room.

2. Adjective + Noun

- The doctor ordered him to take regular exercise.
- The Titanic sank on its maiden voyage.

3. Noun + Noun

- Let's give Mr. Jones a round of applause.
- I'd like to buy two bars of soap, please.

4. Noun + Verb

- The lion started to roar when it heard the dog barking.
- Snow was falling as our plane took off.

5. Verb + Noun

- The prisoner was hanged for committing murder.
- He has been asked to give a presentation about his work.

6. Verb + Expression with Preposition

- We had to return home because we had run out of money.
- At first, her eyes filled with horror, and then she burst into tears.

7. Verb + Adverb

- She placed her keys gently on the table and sat down.
- Mary whispered softly in John's ear.

9. Short answer Questions

1. Describe Musk's early years and how it inspired his interest in business and technology.

Ans: Elon Musk's early years played a significant role in shaping his interest in business and technology. Born on June 28, 1971, in Pretoria, South Africa, Musk displayed an early aptitude for both entrepreneurial and technological pursuits. Here's an overview of his early life and how it influenced his career:

Childhood and Education: Musk had a keen interest in computers from a young age. He taught himself programming and, by the age of 12, created and sold a basic video game called Blaster. He was an avid reader and consumed a wide range of books, which broadened his knowledge and provided him with a strong foundation in various subjects.

Moving to Canada and Education in the United States: Musk left South Africa for Canada at the age of 17, in part to avoid mandatory military service and also to explore new opportunities.

He attended Queen's University in Kingston, Ontario, and later transferred to the University of Pennsylvania in the United States. There, he studied physics and economics, earning two bachelor's degrees.

Business Ventures: In 1995, Musk dropped out of a PhD program at Stanford University after just two days. He saw the potential of the internet and decided to start an internet-based business.

Musk co-founded Zip2, a company that provided business directories and maps for newspapers. Compaq eventually acquired Zip2 for nearly \$300 million in 1999, providing Musk with his first substantial financial success.

PayPal and Financial Success: Musk co-founded X.com, an online payment company, in 1999. X.com later became PayPal after a merger and was sold to eBay in 2002 for \$1.5 billion. Musk received a significant payout from this deal.

SpaceX and Tesla: Musk's interest in space and electric vehicles had deep roots. He had long been fascinated by space exploration and was inspired by his desire to see humanity become multi-planetary.

Musk founded SpaceX in 2002 with the goal of reducing space transportation costs and enabling the colonization of Mars. This venture was inspired by his passion for space technology and his belief in the importance of space exploration for the future of humanity.

In 2004, he also co-founded Tesla, an electric car company, driven by his concerns about environmental issues and the need to transition away from fossil fuels.

Renewable Energy and Transportation: Musk's interest in technology extended to renewable energy and transportation. He co-founded Solar City, a solar energy services company, and played a significant role in developing the Tesla electric vehicles, which aimed to accelerate the world's transition to sustainable energy.

The Boring Company and Neuralink: Musk founded The Boring Company in 2016, focusing on tunnel construction and urban transportation solutions.

He co-founded Neuralink in 2016, a neurotechnology company aimed at developing brain-computer interfaces to address various neurological issues.

Musk founded The Boring Company in 2016, focusing on tunnel construction and urban transportation solutions.

He co-founded Neuralink in 2016, a neurotechnology company aimed at developing brain-computer interfaces to address various neurological issues.

2. Briefly describe two of Musk's early business ventures.

Ans: Elon Musk had several early business ventures, two of which include:

Zip2 Corporation: In 1996, Elon Musk co-founded Zip2, a company that provided online business directories and maps for newspapers. The company was eventually sold to Compaq for nearly \$300 million in 1999, providing Musk with his first significant financial success.

X.com and PayPal: In 1999, Musk founded X.com, an online payment and financial services company. X.com later evolved into PayPal after a merger with Confinity. PayPal became a widely used online payment platform, and it was acquired by eBay in 2002 for \$1.5 billion in stock. This success provided Musk with substantial capital to invest in his future ventures, including SpaceX and Tesla.

3. What is SpaceX and what has been its impact on space exploration?

Ans: SpaceX, or Space Exploration Technologies Corp., is an American aerospace manufacturer and space transportation company founded by Elon Musk in 2002. The company's primary goal is to reduce the cost of space travel and enable the colonization of Mars. SpaceX has made significant advancements in the field of space exploration and has had a profound impact in several ways:

Reusable Rockets: One of SpaceX's major contributions to space exploration has been the development of reusable rocket technology. Their Falcon 9 rocket, equipped with a reusable first stage, has dramatically reduced the cost of launching payloads into space. Reusing rockets has the potential to make space travel more affordable and accessible.

Commercial Space Industry: SpaceX has played a pivotal role in the growth of the commercial space industry. By offering cost-effective launch services, they have attracted numerous customers, including government agencies, private companies, and international organizations. This has encouraged competition and innovation in the space sector.

Mars Colonization: SpaceX's long-term vision includes enabling human colonization of Mars. The company is actively developing the Star ship spacecraft, which is intended to carry large numbers of people and cargo to Mars. This ambitious goal has reinvigorated discussions about interplanetary exploration and has the potential to shape the future of space travel.

Space Station Resupply: SpaceX's Dragon spacecraft has been used to resupply the International Space Station (ISS) under NASA's Commercial Resupply Services program. This has reduced reliance on other nations' spacecraft and has enhanced the sustainability of the ISS.

Public Excitement and Awareness: SpaceX's high-profile missions, such as the launch of the Tesla Roadster into space or the crewed missions to the ISS, have captured the public's imagination and increased interest in space exploration. The company has contributed to a renewed sense of excitement about the possibilities of space travel.

4. How have Musk's business ventures attempted to transform the healthcare industry?

Ans: Elon Musk's primary business ventures have not been focused on transforming the healthcare industry. Musk is known for his involvement in companies like Tesla, SpaceX, Neuralink, and The Boring Company, which are primarily focused on electric vehicles, space exploration, neural technology, and infrastructure, respectively.

However, it's worth noting that Musk has indirectly contributed to healthcare in some ways:

Neuralink: While not primarily a healthcare company, Neuralink, founded by Musk, aims to develop brain-computer interface technology. This technology could potentially have medical applications in the future, such as helping individuals with neurological conditions or spinal cord injuries regain some level of mobility and independence. Although Neuralink is more focused on improving the interface between humans and computers, the medical applications of such technology could be significant.

Tesla: Tesla, one of Musk's most well-known companies, has been involved in the development of electric vehicles and renewable energy solutions. While Tesla's primary focus is on sustainability and transportation, the widespread adoption of electric vehicles contributes to reduce air pollution, which has indirect health benefits by improving air quality and reducing respiratory diseases in the long term.

It's possible that Musk or his companies may invest more directly in healthcare initiatives in the future, but as of my last update, their primary focus has been in other industries. Please consult more recent sources to see if there have been any developments in Musk's involvement in the healthcare sector since then.

Essay Questions:

1. How have Tesla and the Hyperloop radically revolutionized transportation?
2. In what way has Musk proved to be a visionary leader of cutting-edge technology? Discuss with relevant examples?

10. Assignment Questions

1.	Describe Musk's early years and how it inspired his interest in business and technology.
2.	Briefly describe two of Musk's early business ventures.
3.	What is SpaceX and what has been its impact on space exploration?

11. Practice Quiz

1. Elon Musk was born on _____ []
 A) 28 June 1971 B) 28 June 1981 C) 18 June 1971 D) None
2. Elon's birthplace is _____ []
 A) South America B) Canada C) South Africa D) None
3. Elon started Zip2 in _____ []
 A) 1995 B) 1895 C) 1996 D) None
4. Elon's Zip2 acquired him _____ million dollars in four years. []
 A) 500 B) 600 C) 300 D) None
5. X.com was founded in _____ []
 A) 1999 B) 1995 C) 1996 D) None
6. SpaceX was founded in _____ []
 A) 1999 B) 2002 C) 2001 D) None
7. SpaceX launched _____ []
 A) Falcon 1 B) Falcon 2 C) Falcon 3 D) None
8. The Falcon 9 was introduced in _____ []
 A) 2009 B) 2010 C) 2012 D) None

9. In 2004 Musk joined Tesla Motors as _____ []

A) Manager B) CEO C) Chairman D) None

10. The world's first high performance electric car was _____ []

A) Model S B) Tesla's Roadster C) Model 3 D) None

12. SUPPORTIVE ONLINE CERTIFICATION COURSES

NPTEL

13. REAL TIME APPLICATIONS

S. No	Application	CO
	Recall five ways in which you waste time every day.	
	What can you do to rectify these things.
